

September 2026

Heartfelt Thoughts

Welcome to the official start of our 2026-2027 school year. We are delighted to move forward with familiar faces, and are enthusiastic to welcome new families to the center. We are eager to dive into our enhanced curriculum and into a year of growth at all levels. Through our progressive activities, concrete learning opportunities, and support and encouragement from our teachers, your child will soar through creating their academic foundation. Let the adventures begin! September is the time for our children to explore around their new classrooms. Each classroom teacher shares information about themselves and their classroom goals. At Precious Memories Place we turn learning into the greatest adventure ever!

Research reveals that students who attend high quality early education programs experience greater academic success and educational attainment.

Global Trotters

We are enthusiastic about culture here at Precious Memories Place! Beginning in October we will be doing a lot of "in-house" traveling and exploring through our global trotters program.

We explore countries, their history and culture while also experiencing some of their well-known foods and customs. The countries we visit are: Brazil, Japan, France, Egypt, Australia, Mexico, India, Spain, Antarctica, China, Russia, Israel, Ireland, Kenya, Argentina, Greece, Iceland, Italy, Morocco, England, Germany and Peru.

We learn many ways to travel and all that is needed to travel. We explore the world map through the eyes of a child. Through music, artifacts, food, animals, language and natural wonders, we explore our precious world together.

Kate's Corner

Setting Your Child Up for a Successful Day

School drop-off can be an emotional time for you and your child. Inspire your child to have a successful start their day by creating a comfortable goodbye ritual, whether that be a high five, an "I love you", or a kiss on both cheeks. Empowering your little pupil through positive language surrounding school will ensure then that their day at school will be filled with fun, learning, and friends. Using "you can" and "you will" statements, such as "You can eat snacks with your friends!" and "You will go outside and play on the playground!" will instill school is a safe and welcoming environment.

PMPlace Yearly Curriculum Enhancements

Curriculum Enhancements are designed to add an innovative flair to conventional learning tools for preschool students. When presented with passion and enthusiasm, children will explore around ideas and activities that will help build a healthy approach to living and being. These enhancements are above and beyond our daily curriculum and are "life coaching strategies" that we introduce to the children throughout the day and week. Teachers implement life tools and approaches that support a healthy mindset, conflict resolution strategies and the awareness of the power that lie within each and every one of them. A strong self-awareness and a fluent academic background set the stage for a successful future as well as a life of learning. September's curriculum enhancement is: Inspiration and Exploration.
